29. Compound Words (Set B)

Year 4 · **Supplementary Worksheet** — extra practice & worked breakdowns

Worked Examples

Example 1 — Finding the bridge word:

Find the one word that completes BOTH compound words below: BOOK + ___ = a compound word, and ___ + ROOM = a different compound word.

Answer: BOOK + STORE = BOOKSTORE, and STORE + ROOM = STOREROOM. Answer: **STORE**.

Example 2 — Multiple-choice bridge word:

Which word completes BOTH gaps to form two compound words: FARM + ___ and ___ + FAST? A) STEAD B) WORK C) HOUSE D) LAND E) YARD

Answer: FARM + STEAD = FARMSTEAD, and STEAD + FAST = STEADFAST. Answer: **A) STEAD**.

Example 3 — Select-all, several words that can follow one anchor word:

Select ALL of the following words that can follow 'SIDE' to make a real compound word. A) WALK B) TRACK C) SHOW D) BOARD E) CHAIR

Answer: SIDEWALK, SIDETRACK, SIDESHOW and SIDEBOARD are all real compound words, so **A, B, C and D** are correct. 'Side chair' is not usually written as one word, so E is not correct.

Example 4 — A longer bridge-word puzzle:

Identify the word that links these two compound words: CAMP + ___ = a compound word, and ___ + WORKS = a different compound word.

Answer: CAMP + FIRE = CAMPFIRE, and FIRE + WORKS = FIREWORKS. Answer: **FIRE**.

Example 5 — Watch out: the bridge word must work on BOTH sides:

In the puzzle 'SNOW + ___ = a compound word, and ___ + CAP = a different compound word,' a student suggests MAN, giving SNOWMAN and MANCAP. Is MAN the correct bridge word here?

Answer: SNOWMAN is a real compound word, so the first half works. But MANCAP is not a real word, so MAN does not complete the second gap. **MAN is not correct here** — a bridge word has to work on BOTH sides, not just one. Always check both halves before giving your final answer.
