01. Place Value

Year 4 · **Supplementary Worksheet** — extra practice & worked breakdowns

Worked Examples

Example 1 — Finding a digit's value:

What is the value of the digit 6 in 26,143?

Answer: Write out the place-value columns: Ten thousands=2, Thousands=6, Hundreds=1, Tens=4, Units=3. The 6 sits in the thousands column, so its value is 6 × 1,000 = **6,000**.

Example 2 — Writing a number in words:

Write 7,029 in words.

Answer: Split the number into thousands and the rest: 7 thousand, and 029. Since the hundreds digit is 0, skip straight to the tens/units: twenty-nine. Answer: **seven thousand and twenty-nine**.

Example 3 — Rounding, step by step:

Round 4,850 to the nearest 100.

Answer: Step 1: find the two multiples of 100 either side — 4,800 and 4,900. Step 2: look at the tens digit (5). Step 3: 5 rounds up, so the answer is **4,900**.

Example 4 — Ordering four numbers:

Order from largest to smallest: 5,681, 5,618, 5,861, 5,186.

Answer: All start with 5, so compare the hundreds digit: 6, 6, 8, 1. 5,861 has the highest hundreds digit (8), so it's largest. Between 5,681 and 5,618 (both hundreds=6), compare the tens digit: 8 beats 1, so 5,681 > 5,618. 5,186 (hundreds=1) is smallest. Answer: **5,861, 5,681, 5,618, 5,186**.

Example 5 — Select-all, with full reasoning:

In the number 38,254, which statements are true? Select ALL that apply. A) The value of the digit 8 is 8,000 B) The value of the digit 3 is 3,000 C) Rounded to the nearest 1,000, it is 38,000 D) Rounded to the nearest 100, it is 38,300

Answer: Columns: Ten thousands=3, Thousands=8, Hundreds=2, Tens=5, Units=4. A: digit 8 is in the thousands column → 8,000 — TRUE. B: digit 3 is in the ten-thousands column → 30,000, not 3,000 — FALSE. C: round to nearest 1,000, look at the hundreds digit (2, below 5) → round down to 38,000 — TRUE. D: round to nearest 100, look at the tens digit (5) → round up to 38,300 — TRUE. Answer: **A, C and D**.

Easy

15 questions

1. Write 4,623 in words.

2. What is the value of the digit 8 in 2,842?

3. Write < or > between these numbers: 6,205 ___ 6,250

4. Round 3,764 to the nearest 10.

5. Put these in order, smallest first: 2,938, 2,893, 2,983.

6. Write 5,107 in words.

7. What is the value of the digit 3 in 7,316?

8. Round 8,241 to the nearest 100.

9. Write < or > between these numbers: 9,042 ___ 9,024

10. Which number is 4,000 + 300 + 20 + 7?

11. Round 6,055 to the nearest 10.

12. Put these in order, smallest first: 7,410, 7,140, 7,401.

13. Write 3,900 in words.

14. What is the value of the digit 0 in 5,068?

15. Round 1,248 to the nearest 1,000.

Standard

20 questions

1. Round 7,352 to the nearest 100, and also to the nearest 10. Which rounded answer is larger?

2. A stadium holds 6,000 seats. 5,742 are filled. How many seats are empty?

3. Which number is 5000 + 600 + 90 + 4? A) 5,964 B) 5,694 C) 5,649 D) 5,906

4. The temperature is 3°C. It falls by 8°C. What is the new temperature? A) 5°C B) -5°C C) 11°C D) -11°C

5. Order from largest to smallest: 4,502, 4,250, 4,520, 4,025.

6. A number rounds to 6,500 when rounded to the nearest 100. What is the smallest whole number it could be?

7. Round 29,480 to the nearest 1,000.

8. Find the range (largest − smallest) of these numbers: 5,318, 5,029, 5,476. A) 358 B) 447 C) 387 D) 458

9. In the number 7,364, select ALL the TRUE statements: A) The value of the digit 3 is 300 B) The value of the digit 7 is 7,000 C) Rounded to the nearest 100, it is 7,400 D) Rounded to the nearest 10, it is 7,370

10. A charity aims to raise £5,000. So far they have raised £4,186. How much more do they need?

11. Round 3,500 to the nearest 1,000.

12. The temperature starts at -4°C and rises by 9°C. What is the new temperature?

13. Which number is NOT equal to 6,000 + 40 + 7? A) 6,047 B) six thousand and forty-seven C) 6,470 D) 6 thousands, 0 hundreds, 4 tens, 7 units

14. Order from smallest to largest: 8,619, 8,196, 8,961, 8,169.

15. A number rounds to 4,800 when rounded to the nearest 100. What is the largest whole number it could be?

16. Round 12,650 to the nearest 1,000.

17. Find the range (largest − smallest) of these temperatures: 6°C, -3°C, 2°C.

18. In the number 9,045, select ALL the TRUE statements: A) The digit 0 has a value of 0 B) The digit 4 has a value of 400 C) Rounded to the nearest 1,000, it is 9,000 D) Rounded to the nearest 100, it is 9,100

19. Write the number that is 1,000 more than 7,382.

20. A library has 3,450 books on Monday. By Friday it has 2,000 more. How many books does it have on Friday?

Hard

5 questions

1. A number, when rounded to the nearest 100, becomes 7,300. When rounded to the nearest 1,000, it becomes 7,000. What is the smallest whole number it could be?

2. Order from smallest to largest: -6°C, 4°C, -2°C, 0°C, -9°C.

3. What is the digit sum (the total of all digits added together) of 6,847?

4. A number rounds to 15,000 when rounded to the nearest 1,000. Which of these could NOT be the original number? A) 14,520 B) 15,480 C) 14,499 D) 15,000

5. Three numbers have a sum of 15,000. The first is 6,284 and the second is 1,000 more than the first. What is the third number?
