05. Number Logic

Year 4 · Mark Scheme — Supplementary Worksheet

Foundation — Answers

1. 15 (the rule is: add the two numbers together)

2. 25 is the odd one out — the other four (6, 12, 18, 24) are all multiples of 6, but 25 is not.

3. 12 years old (Mia = 2×5 = 10, so Noah = 10+2 = 12)

4. B — 13 (the rule is: add the two numbers together)

5. 33 is the odd one out — the other four (14, 21, 28, 35) are all multiples of 7, but 33 is not.

6. 12 points (7+5 = 12)

7. 7 (same rule as rows 1 and 2: add the first two numbers to get the third)

8. 17 (the rule is: add the two numbers together)

9. A, B and D are correct — Zara > Leo > Finn, so Zara is older than Finn (A), Finn is the youngest (B), and Zara is the oldest of the three (D). C and E reverse true comparisons and are false.

10. D — 42 (the other four are all multiples of 5)

11. 12 pencils (4×3 = 12)

12. 15 (the rule is: add the two numbers together)

13. C — 4 (Grace = 6+3 = 9; Leo = 9-5 = 4)

14. 22 is the odd one out — the other four (8, 12, 16, 20) are all multiples of 4, but 22 is not.

15. C — 17 (the rule is: add the two numbers together)

Standard — Answers

16. 30 is the odd one out — the other four (4, 9, 25, 49) are all square numbers, but 30 is not.

17. 9 (the rule is: subtract the smaller number from the larger)

18. 20 stickers (Leo = 6+4 = 10; Priya = 10×2 = 20)

19. C — 14 (the rule is: double the first number, then add the second)

20. 24 is the odd one out — the other four (15, 20, 30, 35) are all multiples of 5, but 24 is not.

21. 40 marks (Priya = 65+15 = 80; Dev = 80÷2 = 40)

22. 12 (same rule as rows 1 and 2: double the first number, then add the second)

23. 7 (the rule is: subtract the smaller number from the larger)

24. A, B and C are correct (each gives 9 using the rule: subtract the smaller number from the larger; D gives 8 and E gives 10, not 9)

25. E — 44 (the other four have digits that add up to a multiple of 3)

26. 28 cupcakes (Stall B = 20×2 = 40; Stall C = 40-12 = 28)

27. 11 (the rule is: subtract the smaller number from the larger)

28. D — 15 (Mia = 9+6 = 15; Dev's age, 6, is not needed)

29. 21 is the odd one out — the other four (10, 15, 25, 30) are all multiples of 5, but 21 is not.

30. C — 12 (the rule is: subtract the smaller number from the larger)

31. £45 (Grace = 25+15 = £40; Noah = 40÷2 = £20; Finn+Noah = 25+20 = £45)

32. 14 (the rule is: add the two numbers together)

33. 8 (the rule is: double the first number, then subtract the second)

34. 27 is the odd one out — the other four (13, 17, 19, 23) are all prime numbers, but 27 is not.

35. C — 4 (the rule is: subtract the smaller number from the larger, then halve the result)

Hard — Answers

36. 61 is the odd one out — the other four (18, 36, 45, 54) all have digits that add up to 9, but 61 does not.

37. 14 (the rule is: add the two numbers together, then double the result)

38. £45 (Zara = 18×2 = £36; teacher = 36-9 = £27; Priya+teacher = 18+27 = £45)

39. A, C and E are correct — Mia > Noah = Omar > Priya, so Mia is older than Priya (A) and Noah is older than Priya (C), and Mia is the oldest of the four (E). B and D reverse true comparisons and are false.

40. 16 (the rule is: double the first number, add the second, then add 1)
