Worked Examples

Easy: 4/9 + 2/9

Answer: Add the numerators (top numbers) since the denominators are the same: 4 + 2 = 6, so 4/9 + 2/9 = 6/9 (= 2/3 in simplest form).

Standard: 7/10 − 4/10

Answer: Same denominator, so subtract the numerators: 7 − 4 = 3, giving 3/10.

Advanced: Multiply 2/7 by 3.

Answer: Multiply the numerator by the whole number and keep the denominator the same: 2 × 3 = 6, so 2/7 × 3 = 6/7.
