Speed, Distance & Time

Year 4 · **Homework Worksheet**

Worked Example

Worked example: A bus travels 80 km in 2 hours. What is its average speed?

Answer: 80 ÷ 2 = 40 km/h.

Easy / Standard (15 questions)

1. A car travels 40 km in 1 hour. What is its speed?
2. Which formula finds speed? A) Distance × Time B) Distance ÷ Time C) Distance − Time D) Time ÷ Distance
3. A cyclist rides at 15 km/h for 2 hours. How far does he travel?
4. A train covers 100 km in 2 hours. What is its speed?
5. Which of these is the correct unit for speed measured over km and hours? A) km B) km/h C) hours D) km²
6. A walker moves at 4 km/h for 3 hours. How far does he walk?
7. A car travels 120 km in 2 hours. What is its average speed?
8. A bus travels at 30 km/h for 4 hours. How far does it travel?
9. Select ALL the speed calculations below that are correct: A) 80 km in 2 hours = 40 km/h B) 60 km in 2 hours = 20 km/h C) 100 km in 5 hours = 20 km/h D) 45 km in 3 hours = 15 km/h E) 90 km in 3 hours = 20 km/h
10. A car travels 180 km in 3 hours. What is its speed?
11. A runner covers 6 km in 2 hours. What is her speed?
12. Which of these speeds is the slowest? A) 35 km/h B) 20 km/h C) 28 km/h D) 40 km/h
13. A coach travels at 55 km/h for 2 hours. How far does it travel?
14. A car takes 3 hours to travel 210 km. What is its average speed?
15. A cyclist travels 10 km in the first hour and 14 km in the second hour. What is his average speed over the 2 hours?

Standard (15 questions)

1. A ship sails 180 km in 3 hours. What is its speed?
2. A tractor drives at 10 km/h for 5 hours. How far does it travel?
3. A car travels 240 km in 4 hours. What is its speed? A) 50 km/h B) 60 km/h C) 70 km/h D) 80 km/h
4. A horse trots at 14 km/h for 3 hours. How far does it travel?
5. A train travels 280 km in 4 hours. What is its speed?
6. A bus travels at 35 km/h for 4 hours. How far does it travel?
7. A plane flies at 500 km/h for 3 hours. How far does it travel? A) 1,000 km B) 1,200 km C) 1,500 km D) 1,800 km
8. A cyclist covers 60 km in 4 hours. What is her speed?
9. A car travels 270 km in 3 hours. What is its speed?

10. A walker travels at 5 km/h for 6 hours. How far does he walk?

11. Select ALL statements that are TRUE about a car travelling at 60 km/h: A) In 2 hours it travels 120 km B) In 3 hours it travels 200 km C) In 1 hour it travels 60 km D) In 4 hours it travels 240 km E) In 5 hours it travels 280 km

12. A train takes 4 hours to travel 260 km. What is its average speed?

13. A coach travels at 48 km/h for 3 hours. How far does it travel?

14. Which journey has the greatest speed? A) 150 km in 3 hours B) 120 km in 2 hours C) 200 km in 5 hours D) 210 km in 3 hours

15. A car travels 120 km in the first 2 hours and 180 km in the next 3 hours. What is its average speed for the whole journey?

Standard / Advanced (15 questions)

1. Driving at a steady average of 40 km/h, how many minutes will it take to complete a 120 km journey?

2. Covering 100 km in a time of 2 hours 30 minutes, what average speed has a train kept up? A) 40 km/h B) 50 km/h C) 45 km/h D) 35 km/h

3. Holding a constant 400 km/h, what distance will a plane cover in just half an hour?

4. Riding at a steady 20 km/h, how many minutes will it take a cyclist to cover 5 km?

5. A car's average speed is 10 km/h faster than 40 km/h. At this speed, how long does it take to cover 150 km?

6. A lorry driver covers the opening 60 km of a route at 30 km/h, then manages the next 80 km at 40 km/h. In total, how many hours does the full route take?

7. Two stations sit 200 km apart. At the very same moment, a train sets off from each, heading towards the other — one at 40 km/h, the other at 60 km/h. After how many hours will they pass each other?

8. A 240 km road trip is driven throughout at a constant 60 km/h. Select ALL of these statements that are TRUE about the trip: A) The whole trip lasts 4 hours B) Speeding up to 80 km/h would cut the trip to 3 hours C) After 2 hours, exactly half the 240 km has been covered D) At 60 km/h, the car covers 20 km in every 30-minute stretch E) At a slower 40 km/h, the trip would last 6 hours

9. Heading out, a cyclist covers 30 km at 15 km/h; coming home along the same route, she manages only 10 km/h. What is the total time for the round trip?

10. Setting off at 08:00, a car drives 120 km at an average 60 km/h and also makes a 30-minute stop along the way. What time does it finally arrive? A) 10:00 B) 10:30 C) 09:30 D) 09:00

11. On the first leg, a ship sails 40 km at 20 km/h; on the second leg it sails a further 60 km, taking 2 hours. What was the ship's average speed over the whole voyage?

12. An 18 km race is run in two stages: the opening 12 km at a pace of 6 km/h, and the closing 6 km at a quicker 12 km/h. What is the runner's total time?

13. Leaving the same starting point at the same time and heading the same way, a car moves at 50 km/h while a motorbike moves at 70 km/h. What distance separates them after 2 hours? A) 20 km B) 30 km C) 40 km D) 50 km

14. A cargo ship needs to cover 350 km in exactly 7 hours. Having averaged 50 km/h for the first 200 km, what average speed is required for the final 150 km?

15. A train's route is made up of two legs — 60 km covered at 60 km/h, followed by 90 km at 45 km/h. What average speed does this give for the whole route?
