Letter Sequences & Alphabet Code

Year 4 · **Mark Scheme**

Lesson Worksheet — Answers

Easy / Standard

1. E

2. F

3. G

4. I

5. J

6. K

7. L

8. M

9. N

10. O

11. P

12. Q

13. R

14. S

15. T

Standard

16. I

17. J

18. K

19. L

20. M

21. N

22. O

23. P

24. Q

25. R

26. S

27. T

28. U

29. V

30. W

Standard / Advanced

31. N — the gap is +3 throughout: B→E→H→K→N.

32. T — the gap is +4 throughout: D→H→L→P→T.

33. L — the gap is −3 throughout: X→U→R→O→L.

34. C) S — the gap is +4 throughout: C→G→K→O, so O+4=S.

35. G — the gap is −4 throughout: W→S→O→K→G.

36. Q — the gap is +3 throughout: E→H→K→N→Q.

37. C) M — the gap is −3 throughout: Y→V→S→P, so P−3=M.

38. H — the gap is −3 throughout: T→Q→N→K→H.

39. V — the gap is +4 throughout: F→J→N→R→V.

40. A, B, D, E — the gap is 4 the whole way through (A), so the next letter is T+4=X (B); the gap between L and P is also 4 (D); H is the first letter (E). The sequence moves forward, not backward, so C is false.

41. O — the gap is +3 throughout: C→F→I→L→O.

42. V — the gap is +4 throughout: B→F→J→N→R, so R+4=V.

43. C) J — the gap is −3 throughout: V→S→P→M, so M−3=J.

44. G — the gap is −3 throughout: S→P→M→J→G.

45. C) P — the gap is +3 throughout: D→G→J→M, so M+3=P.

Homework Worksheet — Answers

Easy / Standard

1. H

2. U

3. V

4. W

5. X

6. Y

7. Z

8. A

9. B

10. C

11. D

12. E

13. F

14. G

15. H

Standard

16. X

17. Y

18. Z

19. M

20. N

21. O

22. P

23. Q

24. R

25. S

26. T

27. U

28. V

29. W

30. X

Standard / Advanced

31. R — the gap is +3; the next term after L is O, and the term after that is R.

32. O — the shift from CAT to DBU is +1 (each letter forward 1), so N becomes O.

33. I — the gap is −3; the next term after O is L, and the term after that is I.

34. C) T — the shift from DOG to EPH is +1, so S becomes T.

35. V — the gap is +4; the next term after N is R, and the term after that is V.

36. S — the gap is +3 throughout (D→G→J→M→P→S); two terms after M is S.

37. H — the gap is −3 throughout (W→T→Q→N→K→H); two terms after N is H.

38. A) DKI — shifting BIG forward 2: B→D, I→K, G→I.

39. UWP — shifting SUN forward 2: S→U, U→W, N→P.

40. FAT — shifting GBU back 1: G→F, B→A, U→T.

41. A, B, E — the shift is +3 (C→F is +3), so A is true; applying +3 to DOG gives G, R, J, i.e. GRJ (B true, C false, since that uses a different shift); BAT shifts to EDW (E true). D is false since the shift is +3, not −3.

42. S — the shift from F to I is +3, so P+3=S.

43. A) DCV — the shift from PEN to RGP is +2, so BAT becomes DCV.

44. C) INT — the shift from DOG to FQI is +2, so decoding KPV by −2 gives I, N, T.

45. UBD — shifting CAT forward 1 gives DBU; swapping the first and last letters of DBU gives UBD.
