25. 26

26. 27

27. 28

28. 29

29. 30

30. 31

Standard / Advanced

31. 22 — gap +5 throughout: 2→7→12→17→22.

32. 34 — gap +5 throughout: 14→19→24→29→34.

33. C) 26 — gap +5 throughout: 6→11→16→21, so 21+5=26.

34. 20 — gap −5 throughout: 40→35→30→25→20.

35. 28 — gap −5 throughout: 48→43→38→33→28.

36. C) 29 — gap +5 throughout: 9→14→19→24, so 24+5=29.

37. 28 — gap +5 throughout: 8→13→18→23→28.

38. 35 — gap −5 throughout: 55→50→45→40→35.

39. 41 — gap +5 throughout: 21→26→31→36→41.

40. A, B, D, E — the gap is 5 throughout (A), so the next number is 45−5=40 (B); the gap between 55 and 50 is also 5 (D); 60 is the first number (E). The sequence decreases, so C is false.

41. 53 — gap +5 throughout: 33→38→43→48→53.

42. 29 — gap +5 throughout: 4→9→14→19→24→29.

43. C) 50 — gap −5 throughout: 70→65→60→55, so 55−5=50.

44. 43 — gap −5 throughout: 63→58→53→48→43.

45. C) 37 — gap +5 throughout: 17→22→27→32, so 32+5=37.

30. 21

Standard / Advanced

31. 28 — the gap is +5 throughout; the next term after 18 is 23, and the term after that is 28.

32. 27 — the common difference is 6, so the 4th term is two steps on from the 2nd term: 15+6+6=27.

33. 20 — the gap is −6 throughout; the next term after 32 is 26, and the term after that is 20.

34. C) 26 — the common difference is −7, so the 4th term is two steps on from the 2nd term: 40−7−7=26.

35. 39 — the gap is +6 throughout; the next term after 27 is 33, and the term after that is 39.

36. 40 — gap +7 throughout (5→12→19→26→33→40); two terms after 26 is 40.

37. 23 — gap −7 throughout (58→51→44→37→30→23); two terms after 37 is 23.

38. D) 48 — each term doubles: 3→6→12→24→48.

© PassFrame Tuition — for registered student use

39. D) 162 — each term is multiplied by 3: 2→6→18→54→162.

40. 6 — each term is halved: 96→48→24→12→6.

41. A, B, D, E — the gap is 7 throughout (A), so the next number is 25+7=32 (B); the gap between 11 and 18 is also 7 (D); 4 is the first number (E). The pattern increases, so C is false.

42. 11 — doubling 5 gives 10, then adding 1 gives 11.

43. B) 18 — subtracting 2 from 8 gives 6, then multiplying by 3 gives 18.

44. 7, 12 — 2+5=7, then 5+7=12.

45. 45 — gap +7 throughout (3→10→17→24→31→38→45); two terms after 31 is 45.
