Letter for Number

Year 4 Pt 2 · **Homework Worksheet**

Worked Example

Example: Using A=1, B=2, … Z=26, what is the value of G + N?

Answer: 21 — G = 7 and N = 14, so 7 + 14 = 21.

Purple — Accessible (15 questions)

1. Using A=1, B=2, … Z=26, what is the value of the letter E?
2. Using A=1, B=2, … Z=26, what letter has the value 9?
3. Using A=1, B=2, … Z=26, what is the value of the letter Q? A) 15 B) 16 C) 17 D) 18 E) 19
4. Using A=1, B=2, … Z=26, what is D + F?
5. Using A=1, B=2, … Z=26, what is L − G?
6. Using A=1, B=2, … Z=26, decode the word given by the numbers 2-1-7. A) BAG B) BIG C) BOG D) BUG E) BEG
7. Using A=1, B=2, … Z=26, encode the word PIG as a sequence of numbers.
8. Using A=1, B=2, … Z=26, what is the value of the letter S?
9. Using A=1, B=2, … Z=26, select ALL the letters below with a value LESS than 10. A) J B) C C) H D) M E) F
10. Using A=1, B=2, … Z=26, decode the word given by the numbers 8-1-20.
11. Using A=1, B=2, … Z=26, what is G + H? A) 13 B) 14 C) 15 D) 16 E) 17
12. Using A=1, B=2, … Z=26, what is the value of the letter W?
13. Using A=1, B=2, … Z=26, encode the word SAD as a sequence of numbers.
14. Using A=1, B=2, … Z=26, what is R − K? A) 5 B) 6 C) 7 D) 8 E) 9
15. Using A=1, B=2, … Z=26, decode the word given by the numbers 10-15-25.

Green — Standard (15 questions)

1. Using A=1, B=2, … Z=26, what is D + I + N?
2. Using A=1, B=2, … Z=26, what is the value of Y − B?
3. Using A=1, B=2, … Z=26, decode the word given by the numbers 7-18-9-14. A) GRIN B) GRAN C) GREN D) GRON E) GRUN
4. Using A=1, B=2, … Z=26, what is the SUM of the values of the letters in the word PEN?
5. Using A=1, B=2, … Z=26, encode the word FISH as a sequence of numbers.
6. Using A=1, B=2, … Z=26, what is N × 2? A) 24 B) 26 C) 28 D) 30 E) 32
7. Using A=1, B=2, … Z=26, what is the value of the letter that comes immediately BEFORE R in the alphabet?
8. Using A=1, B=2, … Z=26, what is the DIFFERENCE between the values of U and N?
9. Using A=1, B=2, … Z=26, select ALL the words below whose letters have a total SUM greater than 35. A) FROG (6,18,15,7) B) BIRD (2,9,18,4) C) DUCK (4,21,3,11) D) LAMB (12,1,13,2) E) SWAN (19,23,1,14)

10. Using A=1, B=2, … Z=26, what is the value of the MIDDLE letter of the word CAT?

11. Using A=1, B=2, … Z=26, what is the value of T + T? A) 36 B) 38 C) 40 D) 42 E) 44

12. Using A=1, B=2, … Z=26, decode the word given by the numbers 3-12-15-23-14.

13. Using A=1, B=2, … Z=26, what is the value of the letter that comes 4 places AFTER E in the alphabet?

14. Using A=1, B=2, … Z=26, what is the SUM of the values of the letters in the word BIRD? A) 30 B) 31 C) 32 D) 33 E) 34

15. Using A=1, B=2, … Z=26, encode the word FROG as a sequence of numbers.

Standard / Advanced (15 questions)

1. Using A=1, B=2, … Z=26, if a letter's value is doubled and the result is 36, what is the letter?

2. Using A=1, B=2, … Z=26, the value of a certain letter is 5 less than the value of P. What is the letter?

3. Using A=1, B=2, … Z=26, what letter is exactly halfway (by value) between D and N?

4. If every letter's value is its usual alphabet position PLUS 10, what letter has a value of 23 under this rule?

5. Using A=1, B=2, … Z=26, the sum of the values of two consecutive letters (one straight after the other in the alphabet) is 31. What are the two letters?

6. Using A=1, B=2, … Z=26, the word BRAVE is encoded as a sequence of numbers. What is the SUM of all five numbers in that code?

7. Using A=1, B=2, … Z=26, a code takes a word and reverses the ORDER of its letters before converting to numbers. What number sequence results from encoding the word CAT this way (i.e. encode its reverse)?

8. Using A=1, B=2, … Z=26, a code adds 2 to every letter's value (wrapping back to 1 after 26, so Y becomes A, and Z becomes B). What does the word FLY become under this code? A) HNA B) HNB C) HMA D) GNA E) HNC

9. Using the same wrapping rule (add 2 to each letter's value, Y→A, Z→B), what word is formed by applying the code to PAW?

10. Using A=1, B=2, … Z=26, which 4-letter word is given by the code 4-9-19-8? A) DISH B) DASH C) DUSH D) DOSH E) DESH

11. Using A=1, B=2, … Z=26, what is the SUM of the code numbers for the word TREE? A) 44 B) 46 C) 48 D) 50 E) 52

12. Using A=1, B=2, … Z=26, a 5-letter word is encoded as 7-18-1-16-5. Decode the word.

13. Using A=1, B=2, … Z=26, if the code for a word is formed by ADDING 1 to each letter's usual value, what is the code for the word EGG under this rule? A) 6-8-8 B) 5-7-7 C) 6-7-7 D) 5-8-8 E) 6-8-7

14. Using A=1, B=2, … Z=26, select ALL the pairs of letters below whose values add up to EXACTLY 26. A) D and V B) H and R C) J and P D) M and L E) C and Y

15. Using A=1, B=2, … Z=26, the code for a word is 19-20-1-18. Decode the word, then state the value you would get if you added 5 to the LAST number in the code.
