Place Value

Year 5 Accelerated — Homework ⏱ 45 min

Worked example — read this through before you start

Worked example: Round 528,760 to the nearest 10,000.

Method & answer: 528,760 lies between 520,000 and 530,000. Since 8,760 is more than half of 10,000, round up. Answer: 530,000.

Easy / Standard — *work through together, answer 5 in the lesson* ⏱ *15 min (1 min per question)*

1. What is the value of the 2 in 4,271?
2. What is the value of the 7 in 71,340?
3. Write 8,035 in words.
4. Write "five thousand, six hundred and twenty-one" as a number.
5. Round 267 to the nearest 10.
6. Round 3,481 to the nearest 100.
7. Write 6,000 + 400 + 10 + 9 as a number.
8. Which is bigger: 9,142 or 9,124?
9. Order smallest first: 4,502, 4,250, 4,520.
10. What is the value of the 8 in 81,904?
11. Round 7,349 to the nearest 1,000.
12. Write 24,073 in words.
13. What is the value of the 5 in 56,208?
14. Fill the gap: 3,928 = 3,000 + 900 + ___ + 8.
15. Which is smaller: 6,708 or 6,780?

Standard — *work through together, answer 5 in the lesson* ⏱ *15 min (1 min per question)*

1. What is the value of the 5 in 35,842,610?
2. Write 24,608,005 in words.
3. Write "seven million, three hundred and forty thousand, nine" as a number.
4. Round 5,738,420 to the nearest 10,000.
5. Round 18,432,900 to the nearest 100,000.
6. Order smallest to largest: −9, 5, −17, −2, 6.
7. Which is warmer: −6°C or −13°C?
8. What number is 10,000 more than 4,821,000?
9. What number is 100,000 less than 6,205,700?
10. Write the 7-digit number with 2 millions, 6 hundred-thousands, 0 ten-thousands, 3 thousands, 0 hundreds, 4 tens and 8 ones.
11. What is the value of the 8 in 18,394,720?
12. Round 7,500,600 to the nearest million.
13. Swap the digits in the hundreds and units place of 4,637. What is the new number?
14. Order largest to smallest: 800,402, 800,420, 800,240.
15. Temperature drops from 3°C by 19°C. What is the new temperature?

Standard / Advanced — *work through together, answer 5 in the lesson* ⏱ *15 min (1 min per question)*

1. What is 100,000 more than the value of the 4 in 5,472,060?

2. Round 6,048,500 to the nearest 100,000, then subtract 6 million.

3. Subtract 10,000 from the smallest possible 6-digit number.

4. Write the 6-digit number where the digit 3 is worth 300,000 and the digit 7 is worth 7,000, with every other digit zero.

5. Round 2,999,700 to the nearest 10,000, then write your answer in words.

6. A charity concert sold 48,750 tickets. A newspaper rounds this to the nearest thousand for its headline. What number does the headline show?

7. The distance from London to Sydney is 16,983 km. Round this distance to the nearest hundred kilometres.

8. A company's profit was £2,384,600 last year and is expected to rise by £1,000,000 next year. Rounded to the nearest million, what profit is expected next year?

9. The temperature in a freezer is −18°C. The temperature in a fridge is 22°C higher. What is the temperature in the fridge?

10. A stadium had an attendance of 62,480 for game one and 58,930 for game two. Round each to the nearest thousand, then find the difference between the rounded figures.

11. The digits 5, 0, 2, 9, 1, 7 are used once each to make the largest possible 6-digit number. Round this number to the nearest 10,000.

12. Three towns have populations 128,450, 128,540 and 124,850. Which town has the largest population?

13. A car's odometer reads 84,999 km. After a 250 km trip, what does it read, rounded to the nearest thousand?

14. A company had 3,482,000 customers, then gained 517,000 more. Round the new total to the nearest million.

15. Write "two thousand and eight" as a number, then write the number that is one hundred years later.
