Roman Numerals & Negative Numbers

Year 5 Accelerated — Homework ⏱️ 45 min

Worked example — read this through before you start

Worked example: Write the Roman numeral for 449.
Method & answer: 449 = 400 + 40 + 9 = CD + XL + IX = CDXLIX.

Easy / Standard — *work through together, answer 5 in the lesson* ⏱ *15 min (1 min per question)*

1. Write 125 as a Roman numeral.

2. What number does CLXVI represent? A) 156 B) 161 C) 166 D) 176

3. Write the Roman numeral for 218.

4. What number does CCCXLIV represent?

5. Which Roman numeral represents 500? A) VC B) D C) LD D) CD

6. The temperature is 9°C. It falls by 15°C. What is the new temperature?

7. Write 260 as a Roman numeral.

8. Order these temperatures from coldest to warmest: -12°C, 6°C, -1°C, -20°C.

9. Select ALL of the Roman numerals below that represent numbers greater than 250: A) CCXLI B) CCLXXX C) CCCXV D) CCXIX E) CDX

10. What number does CCCLXXII represent?

11. The temperature is -16°C. It rises by 22°C. What is the new temperature?

12. Which of these is coldest? A) -19°C B) -4°C C) 11°C D) -25°C

13. Write 430 as a Roman numeral.

14. What number does CDXCVI represent?

15. The temperature starts at -8°C and falls by 14°C. What is the new temperature?

Standard — *work through together, answer 5 in the lesson* ⏱ *15 min (1 min per question)*

1. Write 555 as a Roman numeral.

2. What number does DCXCIII represent?

3. Which Roman numeral represents 950? A) CML B) LM C) CDL D) ML

6. Order these numbers from smallest to largest: -33, 9, -48, -6.

7. What number does CMXLIV represent? A) 844 B) 944 C) 964 D) 1,044

8. The temperature is -31°C. It rises by 40°C. What is the new temperature?

11. Select ALL of the Roman numerals below that represent numbers between 500 and 800: A) CDLX B) DXCIX C) DCCLIII D) CCCXCIX E) DCCLXXXV

12. Write 618 as a Roman numeral.

13. What number does CMXII represent?

4. The temperature is 17°C. It falls by 29°C. What is the new temperature?

5. Write 777 as a Roman numeral.

9. Write 909 as a Roman numeral.

10. What is the difference between 16°C and -21°C?

14. Which temperature is warmest? A) -36°C B) -9°C C) 7°C D) -44°C

15. The temperature starts at -19°C, falls by 17°C, then rises by 25°C. What is the final temperature?

Standard / Advanced — *work through together, answer 5 in the lesson* ⏱ *15 min (1 min per question)*

1. A number's Roman numeral is CDLXXVI. What is 100 more than this number?

2. The temperature is 18°C below the temperature shown on a thermometer reading 5°C. What is the temperature? A) -23°C B) -13°C C) 13°C D) 23°C

3. Write the number 623 as a Roman numeral, then write the Roman numeral for 150 less than 623.

4. A number written in Roman numerals is CCXVII. What is double this number?

5. A thermometer reads -26°C. It then reads a temperature that is 39°C higher. Which of these is the new reading? A) -65°C B) -13°C C) 13°C D) 65°C

6. Write 344 as a Roman numeral, then find the Roman numeral for 344 + 155.

7. The temperature at 4am is -23°C. It rises steadily and by 4pm it is 17°C. By how many degrees did it rise?

8. Select ALL of the following that are TRUE: A) DCCXXXI represents 731 B) MCXLIV represents 1,144 C) -29°C is 12°C colder than -17°C D) 6°C is 33°C warmer than -27°C E) CDXCVI represents 486

9. A number written in Roman numerals is DCCXLII. Subtract 175 from this number and write your answer as a Roman numeral.

10. A diver is at -58 m. She rises 21 m, then dives down a further 39 m. What is her final depth? A) -76 m B) -58 m C) -40 m D) -118 m

11. Write the Roman numeral for 683, then for 683 − 256.

12. The temperature drops from 14°C to -22°C overnight, then rises by half of that drop the next morning. What is the temperature after the rise?

13. A number written as a Roman numeral is DCCXCIX. This number is doubled. What is the result, written as an ordinary number? A) 1,498 B) 1,598 C) 1,698 D) 1,798

14. A bank account balance is -£184. £259 is paid in. What is the new balance?

15. Write the Roman numerals for 856 and 349. What is the difference between the two ordinary numbers they represent, and express your answer as a Roman numeral too?
