31. Move a Letter (Set B)

Year 4 · **Supplementary Worksheet** — extra practice & worked breakdowns

Worked Examples

Example 1 — Finding the letter:

Move ONE letter from the first word to the second word so BOTH become new, real words. Which letter moves? BRAT and OAT

Answer: Remove B from BRAT to leave RAT (a real word), then add B to the front of OAT to make BOAT (a real word). Answer: **B**.

Example 2 — Multiple-choice:

Which letter can be moved from the first word to the second so BOTH become new valid words: SWAN and OLD? A) S B) W C) A D) N

Answer: Remove S from SWAN to leave WAN (real), then add S to the front of OLD to make SOLD (real). Answer: **A) S**.

Example 3 — Select-all, watch for a letter that only half-works:

Select ALL the letters that can be moved from the first word to the second so BOTH become new real words: SNAP and AT. A) S B) N C) A D) P

Answer: S gives NAP and SAT, and N gives SAP and ANT — both are real word pairs, so **A and B** are correct. Removing A or P from SNAP does not leave a real word, so C and D are not correct.

Example 4 — A longer pair of words:

Work out which letter moves from the first word to the second word to form two new words: SPRINT and OLD

Answer: Remove S from SPRINT to leave PRINT (real), then add S to the front of OLD to make SOLD (real). Answer: **S**.

Example 5 — Watch out: the letter must work for BOTH words:

A student is trying to find the letter for SPORE and OLD. They remove P, leaving SORE (a real word) — but does OLD become a real word with P added? Explain why P is not correct, and give the correct letter instead.

Answer: SORE is a real word, but 'POLD' is not a real English word, so P does not work for both words. The correct letter is **S**, giving PORE and SOLD.
