06. Insert a Letter

Year 4 · **Supplementary Worksheet** — extra practice & worked breakdowns

Worked Examples

Example 1 — Simple letter insertion:

Find the letter that completes the word on the left and begins the word on the right: CO(_)AT

Answer: COB ends in B, and BAT begins with B. Answer: **B** (COB | BAT).

Example 2 — Multiple-choice:

Which letter completes both words below? GRA(_)OAT A) B B) N C) P D) S

Answer: GRAB ends in B, and BOAT begins with B, so **A) B** is correct. None of GRAN, GRAP or GRAS pair up with a real word on the right.

Example 3 — Select-all:

Select ALL options below where ONE letter correctly completes both the word ending on the left and the word beginning on the right. A) SLA(_)AP B) FRO(_)OST C) TWI(_)ISE

Answer: SLAM | MAP (A) and FROM | MOST (B) both work with the letter M, so **A and B** are correct. For TWI(_)ISE (C), no single letter completes both TWI_ and _ISE as real words, so C is incorrect.

Example 4 — Single-word variant:

Insert one letter to complete this word: FR(_)DGE

Answer: The missing letter is I, completing the word **FRIDGE**.

Example 5 — Slightly trickier pair:

Find the letter that completes the word on the left and begins the word on the right: SPA(_)ARE

Answer: SPAR ends in R, and RARE begins with R. Answer: **R** (SPAR | RARE).
