Dividing & Multiplying by 10 and 100

Year 4 · Supplementary Worksheet — extra practice & worked breakdowns

Worked Examples

Example 1 — Multiplying by 10: 48 × 10

Answer: Multiplying by 10 shifts every digit one place to the left (adds a zero for a whole number): 48 × 10 = 480.

Example 2 — Multiplying by 100: 48 × 100

Answer: Multiplying by 100 shifts every digit two places to the left: 48 × 100 = 4,800.

Example 3 — Dividing by 10 with a decimal result: 37 ÷ 10

Answer: Dividing by 10 shifts every digit one place to the right. 37 becomes 3.7 (the 7 moves into the tenths column).

Example 4 — Dividing by 100: 900 ÷ 100

Answer: Dividing by 100 shifts every digit two places to the right: 900 ÷ 100 = 9.

Example 5 — Chaining two operations: A farmer has 100 crates, each holding 10 apples. The whole load is shared equally between 10 trucks. How many apples does each truck carry?

Answer: Total apples: 100 × 10 = 1,000. Shared between 10 trucks: 1,000 ÷ 10 = 100 apples per truck.

Foundation

(15 questions)

1. 20 × 10
2. 88 × 100
3. 470 ÷ 10
4. 7200 ÷ 100
5. 93 × 10
6. 86 × 100
7. 250 ÷ 10

8. 3900 ÷ 100
9. 81 × 10
10. 56 × 100
11. 760 ÷ 10
12. 9400 ÷ 100
13. 69 × 10
14. 71 × 100
15. 970 ÷ 10

Standard

(20 questions)

1. 68 ÷ 10 (give your answer as a decimal)
2. 194 × 10, then × 10 again
3. Ben buys 100 stickers costing 26p each. What is the total cost in pence, and in pounds?
4. A warehouse packs 4,720 tins into boxes of 10. How many boxes are needed?
5. 126 × 100, then ÷ 10
6. 67 ÷ 10 (give your answer as a decimal)
7. 136 × 10, then × 10 again
8. Isaac buys 100 stickers costing 7p each. What is the total cost in pence, and in pounds?
9. A warehouse packs 8,490 tins into boxes of 10. How many boxes are needed?
10. 37 × 100, then ÷ 10
11. 90 ÷ 10 (give your answer as a decimal)
12. 193 × 10, then × 10 again
13. Ben buys 100 stickers costing 40p each. What is the total cost in pence, and in pounds?
14. A warehouse packs 6,090 tins into boxes of 10. How many boxes are needed?
15. 236 × 100, then ÷ 10
16. 66 ÷ 10 (give your answer as a decimal)
17. 232 × 10, then × 10 again
18. Isaac buys 100 stickers costing 47p each. What is the total cost in pence, and in pounds?
19. A warehouse packs 5,630 tins into boxes of 10. How many boxes are needed?
20. 279 × 100, then ÷ 10

Hard

(5 questions)

1. Find the missing number: 11 × ___ = 11,000
2. 67 ÷ 100 (give your answer as a decimal)
3. What single operation has the same effect as '× 10, then × 10 again' on 42?
4. A charity raises £3,100, split equally between 100 local schools. How much does each school get?
5. Is '82 ÷ 10 ÷ 10' the same as '82 ÷ 100'? Explain.
