16. Letter for Number

Year 4 · **Supplementary Worksheet** — extra practice & worked breakdowns

Worked Examples

Example 1 — Adding letter values:

Using A=1, B=2, C=3 … Z=26, what is the value of H + L?

Answer: H = 8 and L = 12, so 8 + 12 = **20**.

Example 2 — Decoding a word:

Using A=1, B=2, … Z=26, decode the word given by the numbers 16-9-7.

Answer: 16 = P, 9 = I, 7 = G. Answer: **PIG**.

Example 3 — A shifted code:

If A=3, B=4, C=5 … (each letter's value is 2 more than its usual alphabet position), what is the value of the letter G?

Answer: G is normally the 7th letter, and 7 + 2 = **9**.

Example 4 — Multiple-choice:

Using A=1, B=2, … Z=26, what is the value of the letter W? A) 21 B) 22 C) 23 D) 24 E) 25

Answer: W is the 23rd letter of the alphabet. Answer: **C) 23**.

Example 5 — Select-all:

Using A=1, B=2, … Z=26, select ALL the letters below with a value LESS than 10. A) G B) K C) D D) H E) M

Answer: G=7, D=4 and H=8 are all less than 10, so **A, C and D** are correct. K=11 and M=13 are both 10 or more, so B and E are incorrect.

Foundation

15 questions

1. Using A=1, B=2, … Z=26, what is the value of the letter Q?

2. Using A=1, B=2, … Z=26, what letter has the value 8?

3. Using A=1, B=2, … Z=26, what is the value of the letter L? A) 11 B) 12 C) 13 D) 14 E) 15

4. Using A=1, B=2, … Z=26, what is C + F?

5. Using A=1, B=2, … Z=26, what is K − D?

6. Using A=1, B=2, … Z=26, decode the word given by the numbers 7-9-7. A) GAG B) GIG C) FIG D) GIF E) FIT

7. Using A=1, B=2, … Z=26, encode the word CUP as a sequence of numbers.

8. Using A=1, B=2, … Z=26, what is the value of the letter N?

9. Using A=1, B=2, … Z=26, select ALL the letters below with a value LESS than 10. A) E B) L C) D D) N E) I

10. Using A=1, B=2, … Z=26, decode the word given by the numbers 2-21-19.

11. Using A=1, B=2, … Z=26, what is G + H? A) 13 B) 14 C) 15 D) 16 E) 17

12. Using A=1, B=2, ... Z=26, what is the value of the letter X?

13. Using A=1, B=2, ... Z=26, encode the word PEN as a sequence of numbers.

14. Using A=1, B=2, ... Z=26, what is M − H? A) 4 B) 5 C) 6 D) 7 E) 8

15. Using A=1, B=2, ... Z=26, decode the word given by the numbers 9-3-5.

Standard

20 questions

1. Using A=1, B=2, ... Z=26, what is D + J + O?

2. Using A=1, B=2, ... Z=26, what is the value of Z − B?

3. Using A=1, B=2, ... Z=26, decode the word given by the numbers 19-20-1-18. A) STAB B) STAR C) STAG D) STAN E) STAY

4. Using A=1, B=2, ... Z=26, what is the SUM of the values of the letters in the word FIG?

5. Using A=1, B=2, ... Z=26, encode the word CORN as a sequence of numbers.

6. Using A=1, B=2, ... Z=26, what is L × 2? A) 20 B) 22 C) 24 D) 26 E) 28

7. Using A=1, B=2, ... Z=26, what is the value of the letter that comes immediately after S in the alphabet?

8. Using A=1, B=2, ... Z=26, what is the DIFFERENCE between the values of Y and Q?

9. Using A=1, B=2, ... Z=26, select ALL the words below whose letters have a total SUM greater than 30. A) PEN (16,5,14) B) FOX (6,15,24) C) CUP (3,21,16) D) ICE (9,3,5) E) BUS (2,21,19)

10. Using A=1, B=2, ... Z=26, what is the value of the MIDDLE letter of the word PEN?

11. Using A=1, B=2, ... Z=26, what is U + U? A) 40 B) 42 C) 44 D) 46 E) 48

12. Using A=1, B=2, ... Z=26, decode the word given by the numbers 8-15-14-5-25.

13. Using A=1, B=2, ... Z=26, what is the value of the letter that comes 4 places AFTER K in the alphabet?

14. Using A=1, B=2, ... Z=26, what is the SUM of the values of the letters in the word TOP? A) 51 B) 52 C) 53 D) 54 E) 55

15. Using A=1, B=2, ... Z=26, encode the word LAMB as a sequence of numbers.

16. Using A=1, B=2, ... Z=26, what is R + S? A) 35 B) 36 C) 37 D) 38 E) 39

17. Using A=1, B=2, ... Z=26, what is the value of the letter that comes immediately BEFORE M in the alphabet?

18. Using A=1, B=2, ... Z=26, decode the word given by the numbers 13-21-7.

19. Using A=1, B=2, ... Z=26, select ALL the letters below with a value GREATER than 18. A) T B) Q C) V D) R E) P

20. Using A=1, B=2, ... Z=26, what is the SUM of the values of the letters in the word NET?

Hard

5 questions

1. A code gives every letter a value 3 higher than its spot in the alphabet (so A=4, B=5, C=6 and so on). What value does this code give the letter H?

2. Keep that same +3 code from the last question. What value does it give the letter N?

3. A different code gives each letter a value 5 higher than its spot in the alphabet (A=6, B=7, C=8...). What value does J get? A) 13 B) 14 C) 15 D) 16 E) 17

4. A code gives every letter a value 9 higher than its spot in the alphabet (A=10, B=11...). Select ALL the letters below worth 20 or MORE on this code. A) F B) K C) L D) C E) D

5. Standard code A=1, B=2 ... Z=26. Find a single letter that, added to E's value, gives exactly L's value.
