09. Fractions: Concept & Equivalence

Year 4 · Mark Scheme — Supplementary Worksheet

Foundation — Answers

1. Numerator = 2, denominator = 5

2. B — 3

3. 2/3

4. 3/12

5. B — 5/9

6. Numerator = 4, denominator = 7

7. 3

8. B — 5/8

9. 2/8

10. 5/9

11. B — 6

12. 4

13. 1/6

14. A, B and D (2/4, 3/6 and 5/10 all equal 1/2; 4/9 and 3/5 do not)

15. 5/7

Standard — Answers

16. 5/10 (equivalent to 1/2 in simplest form)

17. B — 15

18. 2/5

19. 2 3/4 (11 ÷ 4 = 2 remainder 3)

20. A — 7/9

21. 3/9 (equivalent to 1/3 in simplest form)

22. 6

23. B — 1/2

24. 3 1/2 (7 ÷ 2 = 3 remainder 1)

25. 5/7

26. A — 3/8

27. 20

28. 3/5

29. B, D and E (4/10 simplifies to 2/5 and 6/9 simplifies to 2/3, so those two are not already in lowest terms)

30. 1 (9/9 makes a whole)

31. 4 (1/5 of 10 = 2 given away, 8 remain, 8 ÷ 2 = 4 each)

32. A — 3 3/5 (13/5 = 2 3/5, then + 1 whole = 3 3/5)

33. 21 (1/3 of 24 = 8 eaten, 16 remain, 16 + 5 = 21)

34. 5/8 (already in simplest form)

35. A — 1/4 (1/4 = 2/8, which is bigger than 1/8)

Hard — Answers

36. 4 each (1/4 of 16 = 4 given away, 12 remain, 12 ÷ 3 = 4 each)

37. A — 3 1/5 (17/5 = 3 2/5, then 3 2/5 − 1/5 = 3 1/5)

38. 27 (1/4 of 28 = 7 eaten, 21 remain, 21 + 6 = 27)

39. A, B and D (14/16, 21/24 and 35/40 all simplify to 7/8; 7/9 is a different fraction)

40. A — 2/5 (2/5 = 16/40 and 3/8 = 15/40, so 2/5 is bigger)
