08. Coordinates & Transformations

Year 4 · Mark Scheme — Supplementary Worksheet

Foundation — Answers

1. 4

2. 7

3. (6, 3)

4. (5, 5)

5. A — (4, 4)

6. The y-axis

7. The x-axis

8. (5, 8)

9. (1, 6)

10. A and B (both P and Q have x-coordinate 4; R and S have x-coordinate 9)

11. (7, 3)

12. A — (5, 1)

13. The same vertical line (both have x-coordinate 3)

14. (9, 6)

15. A — (5, 0)

Standard — Answers

16. (10, 8)

17. (5, -4)

18. (6, 2)

19. A — (3, -7)

20. (-4, 6)

21. 5 units (7 − 2, which is longer than 5 − 2 = 3)

22. (9, 9)

23. (-2, 9)

24. A — (-6, 3)

25. (4, 5)

26. A, C and D (B is false — the side length is 7 − 3 = 4, not 7)

27. (8, 9)

28. (8, -2)

29. A — (1, 10)

30. (9, 3)

31. (7, 3)

32. 5 units (the sides are 7 and 5 units; 5 is the shorter one)

33. (-9, 4)

34. (8, 8)

35. A, B and C (D is false — translating down DEcreases the y-coordinate)

Hard — Answers

36. (9, -5) (translate (5,3) by 4 right, 2 up to get P(9, 5); reflecting P in the x-axis gives (9, -5))

37. (9, 5)

38. (-9, 2) (reflecting (6, -2) in the y-axis gives R(-6, -2); translating R 3 left and 4 up gives (-6-3, -2+4) = (-9, 2))

39. A, B and C (D is false — the area is 6 × 6 = 36 square units, not 42)

40. (3, -1) (translating (-4, 6) by 7 right and 5 down gives M(3, 1); reflecting M in the x-axis gives (3, -1))
