# 03. Addition & Subtraction

Year 4 · **Supplementary Worksheet** — extra practice & worked breakdowns

## Worked Examples

**Example 1 — Mental addition by partitioning:**

Work out 68 + 25 using a mental method.

**Answer:** Partition the second number: 68 + 20 = 88, then 88 + 5 = **93**.

**Example 2 — Column addition with carrying:**

Work out 1,867 + 2,456 using column addition.

**Answer:** Units: 7+6=13, write 3 carry 1. Tens: 6+5+1=12, write 2 carry 1. Hundreds: 8+4+1=13, write 3 carry 1. Thousands: 1+2+1=4. Answer: **4,323**.

**Example 3 — Column subtraction, borrowing across a zero:**

Work out 3,204 − 1,867.

**Answer:** Units: 4 − 7 needs borrowing, but the tens digit is 0, so borrow from the hundreds first: 3,204 becomes 3,1(9)(14). Units: 14−7=7. Tens: 9−6=3. Hundreds: 1−8 needs borrowing from the thousands: 11−8=3. Thousands: 2−1=1. Answer: **1,337**.

**Example 4 — Finding a missing number:**

Find the missing number: 456 + ___ = 1,000.

**Answer:** Think of it as the matching subtraction: 1,000 − 456 = **544**.

**Example 5 — Multi-step word problem:**

A bakery made 2,450 loaves. It sold 1,680 in the morning and baked another 375 in the afternoon. How many loaves does it have now?

**Answer:** First subtract what was sold: 2,450 − 1,680 = 770. Then add what was baked: 770 + 375 = **1,145 loaves**.
