05. Angles & 2D Shapes

Year 4 · Mark Scheme — Supplementary Worksheet

Foundation — Answers

1. Acute

2. Obtuse

3. Right angle

4. Straight angle (a straight line)

5. B — 45°

6. 6

7. 8

8. B — triangle

9. 4

10. 3

11. B and D (170° and 120° are obtuse; 45° is acute, 90° is right, 200° is reflex)

12. Reflex angle

13. 4

14. B — square

15. 5

Standard — Answers

16. 108° (180 − 72)

17. 125° (360 − 95 − 140)

18. 65° (180 − 55 − 60)

19. Scalene

20. B — isosceles

21. 180°

22. 360°

23. 180°

24. 360°

25. A, C and D (pentagon has 5 sides, triangle has 3 — neither is a quadrilateral)

26. 53° (90 − 37)

27. 48° (vertically opposite angles are always equal)

28. 40° (180 − 70 − 70)

29. 80° (360 − 85 − 95 − 100)

30. 6

31. A — circle

32. 45° each ((180 − 90) ÷ 2)

33. A, C and D (B is false — not all rectangles are squares, only ones with 4 equal sides)

34. 120° each (360 ÷ 3)

35. 90° each (180 ÷ 2)

Hard — Answers

36. 72° and 108° (180 shared in a 2:3 ratio — 5 parts of 36°: 2 × 36 = 72, 3 × 36 = 108)

37. 180° (360 shared in a 1:2:3 ratio — 6 parts of 60°; the largest is 3 × 60 = 180)

38. 120° (360 shared in a 2:3:4:3 ratio — 12 parts of 30°; the largest is 4 × 30 = 120)

39. 116° (180 − 64, since angles on a straight line add to 180°)

40. A and B (x = 180 − 42 − 58 = 80°, so A is true; 42, 58 and 80 are all different so the triangle is scalene — B is true; C and D are false, since the largest angle, 80°, is neither obtuse nor a right angle)
