28. Hidden Words & Word-Within-a-Word (Set B)

Year 4 · **Supplementary Worksheet** — extra practice & worked breakdowns

Worked Examples

Example 1 — Finding a hidden word across a join:

Find the hidden word across the join between two neighbouring words in this sentence (it uses the end of one word and the start of the next): 'The pan appeared suddenly on the stove.' (3-letter word)

Answer: The word PAN ends in '…N' and the word APPEARED starts with 'AP…', so paN + APpeared gives **NAP**.

Example 2 — Multiple-choice, a longer hidden word:

A word is hidden across the join between two neighbouring words in this sentence: 'The classic language lesson was surprisingly fun.' Which of these is the hidden word? A) CLAN B) PLAN C) SCAN D) CLAM E) CLAP

Answer: classiC + LANguage gives CLAN. Answer: **A) CLAN**.

Example 3 — Select-all, checking several joins in one sentence:

In this sentence, more than one word is hidden across the joins between neighbouring words: 'The cab arrived just as the team ate their lunch outside.' Select ALL of the following that are genuinely hidden words formed at a join (not just whole words already in the sentence). A) BAR (caB + ARrived) B) ARRIVED (just a whole word) C) MAT (teaM + ATe) D) LUNCH (not a hidden join) E) TEAM (just a whole word)

Answer: caB + ARrived gives BAR, and teaM + ATe gives MAT, so **A and C** are correct. ARRIVED and TEAM are whole words already sitting in the sentence, not words formed at a join, and LUNCH is not formed at any join at all.

Example 4 — A longer, 5-letter hidden word:

Find the hidden word across the join between two neighbouring words in this sentence (it uses the end of one word and the start of the next): 'This harpist played beautifully at the wedding reception.' (5-letter word)

Answer: thiS + HARPist gives **SHARP**.

Example 5 — Watch out for a trap (not every tempting pair works):

In the sentence 'The brave ant marched across the picnic blanket,' is there a genuine hidden word formed across the join between 'brave' and 'ant'?

Answer: It might look as though 'BR' plus 'ANT' spells something, but a hidden word must use only the very END of the first word together with the very START of the second. Here that gives combinations like E+ANT=EANT or VE+ANT=VEANT — neither is a real word, so **there is no genuine hidden word at this join**. Always check the letters right at the join, not letters pulled from elsewhere in the first word.
