Dividing & Multiplying by 10 and 100

Year 4 · Lesson Worksheet

Worked Examples

Easy: 34 × 10

Answer: Multiplying by 10 shifts every digit one place to the left (adds a zero on the end for whole numbers): 34 × 10 = 340.

Standard: 650 ÷ 100

Answer: Dividing by 100 shifts every digit two places to the right: 650 ÷ 100 = 6.5.

Advanced: A shop buys 100 identical toys for a total of £4,200. What is the cost of one toy?

Answer: £4,200 ÷ 100 = £42 per toy (dividing by 100 moves the digits two places right).
