31. Bearings

Year 4 · Mark Scheme — Supplementary Worksheet

Foundation — Answers

1. 000°

2. 090°

3. 006°

4. C — 260

5. East

6. 180°

7. C — South

8. North, North-East, East, South-East, South, South-West, West, North-West

9. 135°

10. C — South-West

11. A, C and D (060°, 210° and 088° are all valid three-figure bearings with exactly 3 digits between 000° and 359°; B is not 3 digits and E is above 359°)

12. 270°

13. They are exactly opposite directions

14. B and C (160° and 190° are between 090° and 270°; 050°, 290° and 340° are not)

15. A — North

Standard — Answers

16. North-East (NE), since 040° is close to the NE bearing of 045°

17. 235°

18. 312°

19. C — 110

20. 020°

21. A, C and D (030°&210°, 150°&330° and 240°&060° are all correct back-bearing pairs; B should be 085°&265° and E should be 290°&110°)

22. 65°

23. B — South-East (118° is closest to the SE bearing of 135°)

24. 020°

25. South-West (SW), with a bearing of 232° (052° + 180°)

26. B — 184

27. A, C and E (the back bearing is 265°, found by adding 180° to 085°, and the two bearings differ by exactly 180°; B is false, since 085° is less than 180° so you add, not subtract, and D is false, since 265° is not less than 180°)

28. 038°

29. 315°

30. 145°

31. 275°

32. South (S), since 160° is close to the S bearing of 180°

33. A — 095

34. 135°

35. 348°

Hard — Answers

36. 230° (050° + 180°)

37. 110° (170° − 060°)

38. 200° (110° + 90°)

39. A, B, D and E (the back bearing is 325° (145°+180°), the park is roughly SE of the house since 145° is close to 135°, the house is roughly NW of the park since 325° is close to 315°, and the two bearings differ by exactly 180°; C is false, since 145° is less than 180° so you add, not subtract, 180°)

40. 90° (the difference between 030° and 300° going the short way round is 360° − 270° = 90°)
