33. Jumbled Sentences

Year 4 · **Supplementary Worksheet** — extra practice & worked breakdowns

Worked Examples

Example 1 — Finding the intruder word:

Look at this jumbled list of words: nibbled / mouse / cheese / some / telescope / tiny / The. One word does not belong in the correctly ordered sentence. Which word is it?

Answer: telescope — the correct sentence is 'The tiny mouse nibbled some cheese.' ('telescope' has no sensible role anywhere in the sentence.)

Example 2 — Multiple-choice, correctly ordered sentence:

Which option below is a correctly ordered, grammatically sound sentence? A) jumped fence the dog the over B) The dog jumped over the fence C) over fence the jumped dog the D) dog the fence jumped over the E) fence over the dog jumped the

Answer: B) The dog jumped over the fence — the other options are scrambled and not grammatically correct.

Example 3 — Select-all, NOT correctly ordered:

Four of the options below are NOT correctly ordered sentences. Select ALL that apply. A) delicious meal a prepared chef the B) the chef a delicious meal prepared C) The chef prepared a delicious meal D) prepared the chef meal a delicious E) a delicious meal the chef prepared

Answer: A, B, D and E — only C) 'The chef prepared a delicious meal' is correctly ordered, so it is the one option NOT selected.

Example 4 — Watch out: the intruder can sound like it almost fits:

Look at this jumbled list of words: bandaged / nurse / knee / kind / dinosaur / boy's / A. One word does not belong in the correctly ordered sentence. Which word is it?

Answer: dinosaur — the correct sentence is 'A kind nurse bandaged the boy's knee.' 'dinosaur' has no sensible role in a sentence about a nurse bandaging a knee, even though every other word fits together naturally.

Example 5 — A longer sentence:

Look at this jumbled list of words: built / children / sandcastle / tall / robot / excited / together / The. One word does not belong in the correctly ordered sentence. Which word is it?

Answer: robot — the correct sentence is 'The excited children built a tall sandcastle together.' ('robot' has no sensible role anywhere in the sentence.) Notice this sentence needs an extra word, 'a', that isn't in the jumbled list — that's fine, as long as every list word except the intruder is used.
